

PRIME Registry Reports Module: You're just a few clicks away from customized reports

The reports module is designed to make reporting for your practice easier. We've pre-configured eleven customizable report templates that allow you to configure the data you need for quick and easy report outputs in three formats (xls, csv and pdf).

Each report template has been created in response to the needs of our practices over the life of the registry. For instance, the report Measure Performance – Location Level showcases key information commonly needed in discussions with practice stakeholders and leadership. The PRIME reports module provides an efficient way to gather precise data to present at your practice's next leadership or board meeting.

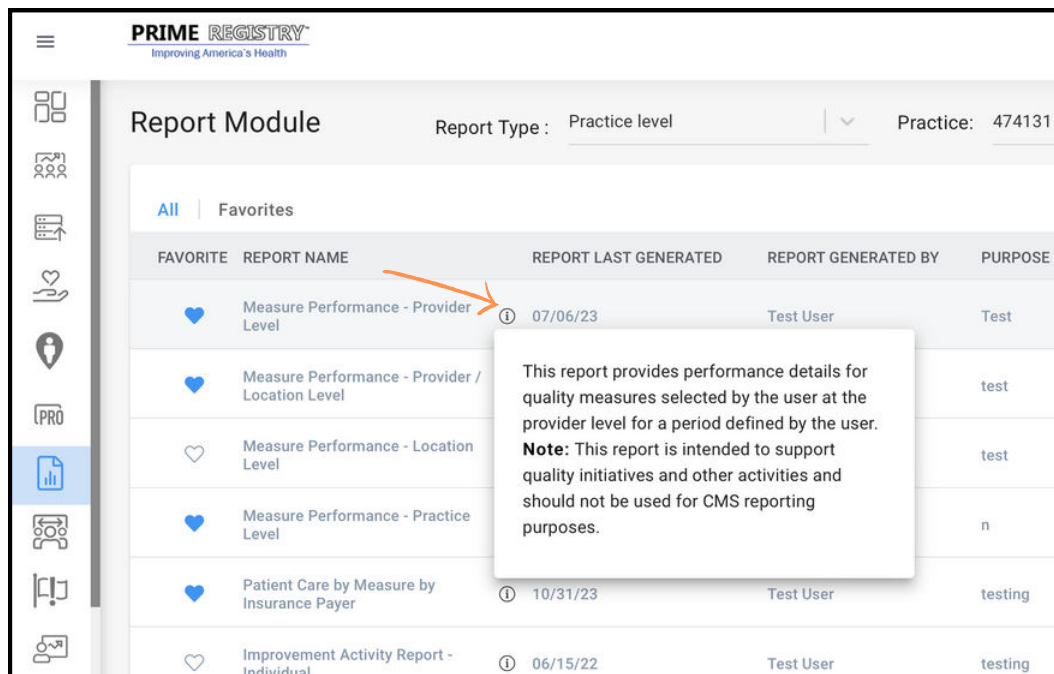

Getting There

To access the Reports tool, head to the left-hand navigation pane in your PRIME Registry quality dashboard, shown below. Click the folded paper icon to open the tool.

Selecting a Report

Once in the tool, select a report and use your mouse to hover over the information (i) icon to view a brief description of the report you are selecting.

Configure the Report

From the selected report bar, click on the filter icon. Fill in the required information fields, and choose measures from the drop down menu. Select the desired reporting timeframe, as well as your requested delivery date.

Pro tip: Including notes on the purpose of the report and the requestor can help if you ever need to access a past report, or are unclear as to why it was run in the first place.

The screenshot shows a configuration form for a report. The title is "Measure Performance - Practice Level". The form includes the following fields and values:

- Submission Date: 01/22/24
- Organization Name: 100890 - Demo Practice 109
- Requester Name: (empty)
- Report Output format: CSV
- Select Measure Set: 2023 PRIME Measure Set
- Select Measures: Select Measures
- Reporting Period Start Date: 01/01/23
- Reporting Period End Date: 12/31/23
- Requested Delivery Date: 01/22/24
- Purpose of Report: (empty text box)

At the bottom right, there are two buttons: "CLOSE" and "APPLY FILTER".

Run the Report Now, or Schedule for a Future Date

We've made it easy to automatically run reports on a routine basis—weekly, monthly, quarterly, annually—whatever you need! Simply set up a report with the future delivery date you need, then return to the reports dashboard when you need it, and click the HISTORY (eyeball) icon to access the report.

With the reports module, record keeping has never been easier. Need to find a previous report? Select the HISTORY (eyeball) icon again, and view the list of previously run reports.

The screenshot shows the "Report Module" dashboard. At the top, it displays "Report Type: Practice level" and "Practice: 474131 - Demo Practice 1436". Below this is a table of reports with columns for Favorite, Report Name, Report Last Generated, Report Generated By, and Purpose of Report. A sidebar on the left contains various icons, including a blue "HISTORY" icon. Below the report list is a detailed table with columns for Submission Date, Requester Name, Purpose of Report, Start Date, End Date, Delivery Date, Measure Selection, Output Format, and a "Click to view history" button. An orange arrow points to the "Click to view history" button in the first row of the detailed table.
